*NPEI reserves the right to request a full CIA over a simplified for unique scenarios. This will be communicated with the Preliminary Consultation Report.

**Single-phase generation project applications cannot exceed 150 kW.

Important Notes:

- CIA fees represent the costs for performing the Connection Impact Assessment study only.
- For generators connecting on a feeder with other shared upstream Utilities, that utility may be required to perform its own Connection Impact Assessment. Details including other Utilities' costs will be provided with the Preliminary Consultation Report.
- Refund policy: Any money not spent will be refunded if the CIA is withdrawn before completion.
