SAFETY FIRST!

During the month of October, NPEI will be conducting our Electricity Safety Awareness Survey. The survey will be completed over the telephone as well as online. We are asking customers to please be aware that they may receive a telephone call asking that they participate in the survey. We would greatly appreciate your participation if you are contacted to complete the survey!

Ahead of the survey, test your safety knowledge and answer Lucky the Squirrel's safety questions!

1) When undertaking outdoor activities – such as standing on a ladder, cleaning windows or eaves, climbing or trimming trees – how close do you believe you can safely come to an overhead powerline with your body or an object?

2) How close do you believe you can safely come to a downed overhead powerline, such as a downed line caused by a storm or accident?

3) If you were in a vehicle – such as a car, bus, or truck – and an overhead powerline came down on top of it, what do you think the appropriate action would be?

Answers:

1) Three metres away from overhead powerlines

2) Ten metres, or the length of a school bus, away from downed powerlines

3) Stay in the vehicle until the power has been disconnected
